

REMARKS/ARGUMENTS

The present Amendment is made to correct various errors in the specification of the above-identified patent application. Claims 1-33 are pending in the present Application.

In a Notice of Allowance, the Examiner indicated that claims 1-33 are allowable as presented. Applicant appreciates the Examiner's allowance of claims 1-33.

Applicant has amended various portions of the specification to correct grammatical and various other minor errors. For example, Applicant has amended the specification to harmonize the specification with the drawings. Accordingly, Applicant respectfully submits that the amendments to the specification introduce no new matter.

Applicant has also provided herewith a substitute Figure 4. In particular, the layer 240 has been relabeled as a conductive spacer layer, while the layer 220 has been relabeled as a barrier layer. Support for this amendment can be found in the specification, page 22, line 18-page 24, line 10. In the original Figure 4, Applicant had inadvertently switched the labeling of layers 220 and 240. Accordingly, Applicant respectfully submits that no new matter is added by the substitute Figure 4.

Applicant's attorney believes that this application remains in condition for allowance. Should any unresolved issues remain, Examiner is invited to call Applicant's attorney at the telephone number indicated below.

Respectfully submitted,

SAWYER LAW GROUP LLP
